

## **Lab 9: Formula Scavenger Hunt**

In this lab, you will be conducting a scavenger hunt on the internet. You'll work through five web pages of clues. The clues will help you find values of A, B, and C, and then you'll use formulas on the pages to find values of D, E, and F. A final formula will help you to find the Page Solution for each page. Record your values and Page Solutions below. Each page is worth 5 points, and **you must have all seven values from each page correct to get those 5 points!**

NOTE: If you get stuck on a page, you **can** proceed to the next page without solving the one you're on. Just make sure you go back and solve it later!

You'll start at <http://coccweb.cocc.edu/srule/MTH098/OnlineSH/SH1.html>.
